

RMKH GLOVE (CAMBODIA) CO LTD

The first fully-automated medical glove factory in Cambodia

About RMKH Glove (Cambodia) Co Ltd

RMKH Glove (Cambodia) Co., Ltd. ("RMKH") was established in December 2021 through Resilient Medical Pte. Ltd. ("Resilient Medical"), a joint venture company of Medtecs Group, to principally manufacture medical-grade nitrile gloves and expand the Group's manufacturing capabilities and product offerings to provide the Group with an opportunity for access to the U.S. market.

Located in Cambodia's first and largest special economic zone, Manhattan Special Economic Zone ("MSEZ"), RMKH is the country's first medical-grade glove manufacturing facility. MSEZ provides easy access to major roads and highways, high-quality labor force, utilities, well-developed infrastructure and on-site, one-stop services by various government agencies for import/export permits and customs clearance.

RMKH currently is focusing on the manufacturing and distribution of disposable medical-grade nitrile gloves, which are widely used in the healthcare industry. The main raw material used in these gloves, NBR latex, has good abrasion and puncture resistance and does not contain allergens found in natural latex, eliminating the risk of latex allergies. RMKH is designed to accommodate up to 10 high-speed double-former dipping lines. Since September 2022, two lines have been put into production with a monthly production capacity of around 50 million pieces of gloves.

Along with over 30 international investors in MSEZ, RMKH will work on integrating more clean and renewable energy into its operation to move towards a more sustainable future. RMKH's glove factory is in the process of getting certified to ISO 9001- and ISO 13485 standards.

In line with Medtecs Group's mission to better the world's health for everyone, everywhere, RMKH will produce high-quality medical-grade gloves to protect the health and safety of medical professionals, care workers and the general population as a whole.

Product Features

- Highly elastic and durable, offering exceptional protection against punctures and tearing
- Light, thin and soft, ensuring a perfect fit to the hand like a second skin
- Odorless and hypoallergenic
- Barrier against corrosive materials, acids, skin irritants and biological hazards, ideal for medical environments and chemical industry

Competitive Strengths & Investment Merits

Competitive Production Cost

- Abundant labor supply, with certification of Verité labor rights organization
- Stable electricity and water supply system inside MSEZ
- Enjoys export incentives

Strategic Location

- Production outside China provides compelling proposition for customers looking to reduce supply chain concentration risks and navigate geopolitical tensions
- One-stop service for export document processing and agency approval

TAA-Compliant

- Located in one of the TAA (Trade Agreements Act) designated countries, with zero tariffs in the United States and the European Union
- Able to satisfy United States Government contract requirements

Worldwide Distribution Capabilities

- Low transportation cost through Cat Lai Port
- Close to Saigon Port and Ho Chi Minh City
- Enjoys stream-lined custom clearing service provided by MSEZ

Green Manufacturing

- Real-time sewage water quality monitoring
- Sewage treatment plant with EIA license
- Integration of green energy into operation and production
- ISO 9001- and ISO 13485-certified manufacturing facility
- Complies with environmental protection laws of Cambodia

Key Corporate Developments

2021

- Jan.** Incorporated Resilient Medical.
- Jul.** Commenced construction of the glove factory.
- Dec.** Incorporated RMKH.

2022

- Jul.** Soft run of the first production line.
- Aug.** Commenced 24-hour soft run of the first production line, followed by soft run of the second production line.
- Sep.** Both lines started production in tandem for the first time.
